PATENT

In the Specification:

Please amend the paragraph at page 71 lines 7-12 as follows:

Software Appendices

Attached [~~hereto~~] as Appendices B-D to U.S. Patent 5,748,763, which is incorporated by reference, are listings of different software programs embodying aspects of the present invention.

These programs were written for an Indigo workstation manufactured by Silicon Graphics, Inc. Appendix B is a program ('sign_it') that encodes a bit-mapped image file with an identification code according to the present invention. Appendices C and D are programs ('recognize.3' and 'recognize.2') that analyze encoded bit-mapped files and extract the identification code therefrom.
